WORK EXPERIENCE:

FRONT END DEVELOPER
Reactr | 2018-2019

- Member of a multidisciplinary team responsible for developing responsive Web sites and customized applications built with the Laravel PHP framework and customized client-side JavaScript
- Used JavaScript to implement site functionality such as scroll animations, image and testimonial sliders, and adding and removing dynamic form components
- Utilized design skills to find and modify aspects of applications to improve the user experience
- Attended client meetings, provided updates, and made changes based on client needs

FRONT END DEVELOPER / UI DESIGNER
Reactr / JE Bearing | 2014-2017

- Joined team as interface designer and front-end developer on an ongoing client project
- Created better access for admins by designing toolbars, used Sass and Blade to restyle CMS forms for better usability, created and implemented a plan for improved flow of commenting functionality through the system
- Created custom lightbox features to dynamically show material lists based on client view and set up dynamic commenting form to add messages to specific sections with JavaScript and Blade templating
- Presented work to clients and made iterative design changes based on ongoing feedback

EDUCATIONAL HISTORY:

FANSHAWE COLLEGE
Interactive Media Design

- Worked independently and on teams to design and develop multiple projects
- Developed skills following designs to build front-end web experiences
- Designed and prototyped interactive web applications
